-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Drawings

Figures 13-18 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, and 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Arima 6,882,455 B2. (This rejection can be overcome by a showing that the reference and application were commonly owned at the time the invention was made.) Arima discloses a movable plate, elastic member 654, wirings 634, 636 and magnetic field generating means 642 all as shown in figure 18 and as described in column 14 line 33 to column 15 line 4.

In regard to claims 2 and 8, see Arima figure 18 element 654.

In regard to claim 9, see Arima column 15 lines 35-45.

Art Unit: 2834

In regard to claim 10, see elements 642 in Arima figure 18.

In regard to claim 11, see Arima column 11 lines 53-67.

Claims 1 and 8-10 are rejected under 35 U.S.C. 102(a) as being anticipated by Subramanian et al. 6,635,837 B2. Subramanian et al. discloses a movable plate 30, elastic member 32, wirings 38, magnetic field generating means 34, 36 as shown in figure 3 and as described in column 3 lines 21-54.

In regard to claims 8-10, see Subramanian et al. figure 3.

Allowable Subject Matter

Claims 12-29 are allowed.

Claims 3-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose or teach elastic members extending in two non-parallel directions in combination with the other features of claim 3. The prior art of record does not disclose or teach a magnetic field with a direction of 45 degrees in combination with the other features of claim 5. The prior art of record does not disclose or teach a first magnetic field having a direction parallel to the flat surface and a second magnetic field having a direction orthogonal to the same in combination with the other features of claim 12.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Judson H. Jones whose telephone number is 571-272-2025. The examiner can normally be reached on 8-4:30 M-F.
